

School of Crystallography

Lunch-time departmental seminars

Prepore and pore forms of the bacterial toxin *pneumolysin*.

Summer Term 2007

The following seminars take place on Mondays from 13.00-14.00 in the Glaxo-Wellcome seminar room (B62), School of Crystallography. All are welcome.

Monday 23 April	'Mitotic spindle formation in fission yeast: what do we learn from yeast' Dr Takashi Toda, Cell Regulation Laboratory, Cancer Research UK [Host: Dr Carolyn Moores]
Monday 30 April	'Positional identity of adult stem cells during salamander limb regeneration' Professor Jeremy Brockes, Department of Biochemistry and Molecular Biology, UCL [Host: Professor Gabriel Waksman]
Monday 7 May	Bank Holiday
Monday 14 May	'Structural studies of a membrane bound translocation machinery' Dr Konstantinos Beis, Division of Molecular Biosciences, Imperial College [Host: Dr Christine Slingsby]
Monday 21 May	'Quantitative and structural approaches to understanding nitrogen metabolite repression in microbial eukaryotes' Professor Alastair Hawkins, Institute for Cell and Molecular Biosciences, University of Newcastle upon Tyne [Host: Dr Renos Savva]
Monday 28 May	Bank Holiday
Monday 4 June	'Title to be announced' Dr Parvez Haris, Faculty of Health & Life Sciences, De Montfort University [Host: Professor Bonnie Wallace]
Monday 11 June	'The evolution of genomic imprinting' Professor Andrew Pomiankowski, Department of Biology, UCL [Host: Dr Christine Slingsby]
Monday 18 June	There will be no seminar this week due to the ISMB Retreat 19-20 June
Monday 25 June	'Structural studies on Holliday junction resolvases' Dr John Rafferty, Molecular Biology and Biotechnology, The University of Sheffield [Host: Dr Tracey Barrett]
Monday 2 July	'A structural and functional view of cellular energy regulation' Dr Steve Gamblin, Molecular Structure Division, NIMR [Host: Dr Nicholas Keep]
