

School of Crystallography

Departmental seminars

Summer 2009

All departmental seminars take place from 1pm - 2pm, Glaxo-Wellcome seminar room (B62/3), School of Crystallography. All are welcome.

Monday 27 April	'Localization of proteins at bacterial cell poles and how this led to bacterial microtubules' Dr Leendert Hamoen, University of Newcastle [Host: Dr Carolyn Moores, Professor Helen Saibil]
Monday 4 May	<i>Bank holiday</i>
Monday 11 May	'A Gene Regulatory Network for Embryonic Development' Dr Paola Oliveri, University College London [Host: Dr Alona Sosinsky]
Monday 18 May	<i>There will be no seminar on this date</i>
Monday 25 May	<i>Bank holiday</i>
Monday 1 June	'Molecular oxygen: small but not that simple. How do CO-forming oxygenases deal with it?' Dr Roberto Steiner, Kings College London [Host: Dr Renos Savva]
Monday 8 June	'Crossover stability: A link between the global topology and local interactions in supercoiled DNA' Dr Peter Varnai, University of Sussex [Host: Dr Maya Topf]
Monday 15 June	'Pore-Walker: a novel tool for the identification and characterization of transmembrane channel proteins from their 3D-structure' Marialuisa Pellegrini-Calace, EBI [Host: Dr Christine Slingsby]
Monday 22 June	'Control of Vertebrate Skeletal Mineralization by Polyphosphates' Professor Marc Grynpas, University of Toronto [Host: Dr Christine Slingsby]
Monday 29 June	'High-throughput crystallography and fragment-based screening: a promising route to high quality leads' Dr Rob van Montfort, The Institute of Cancer Research [Host: Dr Christine Slingsby]
